

Pre Treatment Questionnaire

The following questions are to help us better serve your needs following the completion of your Phase I Initial Therapy (Laser Periodontal Therapy/Infection Control/Cavity Treatments)

Did You Know...

- That the follow-up care for your Initial Therapy, and especially periodontal recare visits, is as important for long term stability (future health) as the initial treatments?
Comments? _____
- That for the first 12 months these post-operative follow up visits allow us to determine the nature and quality of your response to treatment?
Comments? _____
- That we are pleased to learn you are undergoing professional visits at your previous dentist or other dental practitioner, and if you inform us when this is the case, we can remove you from our active patient files?
Comments? _____
- That if we catch signs of early periodontal breakdown, we can spot treat the selected areas with our Periolase laser before entire quadrants may need re-treatments?
Comments? _____
- That if you wish to continue to see another Dentist, we can alternate Periodontal re-care visits to help catch periodontal breakdown (if any) before full-blown infection takes hold?
Comments? _____
- The more the laser is used over time, the healthier tissue becomes, enhancing tissue response and saving otherwise "hopeless" teeth from extraction?
Comments? _____
- That "more is better" when it comes to laser exposure over time?
Comments? _____
